

ALUMINUM SA6000

The Aluminum SA6000 commercial garage door features leading edge design elements combined with extremely lightweight construction. Steel-Craft utilizes full view sections with Thermoclear to deliver a clean look, maximum visibility and high light transmission.

SIZING OPTIONS

Headroom requirements may vary on doors. Track selection subject to weight parameters.

Note: Steel-Craft recommends a TD134 bottom section on Aluminum SA6000 doors 18' wide and over.

Bronze Lexan

Charcoal Lexan

Blue Lexan

Green Lexan

Red Lexan

Note: The glazing material (Thermoclear®) used is ideal for humid environments, however it differs from glass in that it's not sealed, therefore condensation may form in the cellular walls when interior/exterior temperatures are such that dew point temperatures are created (usually in periods of cooler weather). This condensation usually disappears when warmer weather returns.

Don't just hang a door,
Install a Steel-Craft.
